Join us and Qlik on this on-demand webinar for an insightful event. >> Sign up here! I've used Climber Report before and i had to add dimensions and measures to the dataset. Im trying to make a new Climber report and the only option I get is to add a dataset and since I don't have a dataset, I can't add fields to the report! Was there a change/update? Or am I doing something wrong? Any tips to add fields to the report would be great! ThanksPage 2 7 comments Published 26/02/2020 Extensions transform how users get the most out of Qlik Sense. Some of the best extensions focus on presenting complex in an easy, visually accessible way. The growing and engaged Qlik developer community is regularly releasing new extensions, improving sense's power output. Here are some of the more popular extensions that Qlik users benefit most from. Empiric is a multi-award winning business and one of the fastest growing technology and transformation recruitment agency specializes in data, digital, cloud and and We provide technology and change recruitment services to companies that are looking for both contract and permanent professionals. Important: All Climber Extensions were acquired by Vizlib in April 2019 and are now part of our value-added product portfolio for Qlik Sense.Vizlib Custom Report bridges the gap between user and developer. It's a user-friendly extension where you create custom tables based on data in main tables. Super users can quickly structure a template that is simple and safe for anyone to use, and also extremely flexible. Users can then add and remove data from the table, move columns, and sort them without worrying about always correcting table calculations. To show you how fast you get started, we've created a video tutorial on setting up your first report. You can find links to all our Vizlib Custom Report documentation on the product's homepage. We have organized our documents into different categories and to find them easily, we have included keywords in the document title. page helps you get started with Vizlib Custom Report and explains where to find the information you need. If you are new to our products, why not watch our video about getting started with Vizlib here? You can find the latest version of Vizlib Custom Report on our User Portal in the self-service product section of the Downloads page. The software includes an installation file and a demo app to show you how the custom report works. Guides Guides Guides articles containing technical information relating to vizlib custom report. You can find instructions on how to install Vizlib Custom Report here, and after the installation is complete, you can find instructions on setting up Vizlib Custom Report here. Vizlib Custom Report is part of the Vizlib Self-Service product suite and you learn more about Self-Service by viewing our product demonstration. PropertiesProperties articles contain information in the property panel, which you use in the Qlik Sense Hub to manage features for your custom report. These articles cover topics such as visualization settings and the use of templates, and you can find the full list on the documentation homepage. TroubleshootingY you use our troubleshooting articles if you see errors or exceptions in vizlib's custom report. We've compiled documents with known issues, tips for improving performance, and answers to common questions. The full list can be found on the homepage of the documentation. ChangelogThe Changelog includes details for each Release of Vizlib Custom Report, such as new features and bug fixes. You find the changelog on the documentation homepage and you sign up here to receive notifications of new releases for all Vizlib products.
